INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US04/10147**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims <u>1-24, 26</u>	YES
	Claims <u>25, 27</u>	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-27</u>	NO
Industrial Applicability (IA)	Claims <u>1-27</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 25 and 27 lack novelty under PCT Article 33(2) as being anticipated by Bessinger et al. (US 4884847).

Bessinger et al. discloses a method of guiding a miner and a conveyor unit through a mineral seam comprising adjusting movement of said miner by controlling angle between miner and conveyor unit (see abstract, Figures and col. 3).

Claims 1-24, 26 lack an inventive step under PCT Article 33(3) as being obvious over Bessinger et al. in view of Doerr et al. (US 4773520).

Bessinger et al. discloses the invention substantially as claimed. However, Bessinger et al. is silent about having first and second actuators to adjust the angle between the miner and the conveyor unit. Doerr et al. teaches first and second actuators (50,50a) to adjust the angle between conveyor units. It would have been considered obvious to one of ordinary skill in the art to modify Bessinger et al. to include first and second actuators as taught by Doerr et al. since such a modification allows the conveyor to follow in the direction of the miner.

Claims 1-27 meet the criteria set out in PCT Article 33(4), and thus claims 1-27 have industrial applicability because the subject matter claimed can be made or used in industry.
